BIFIDOPHILUS - FLORA FORCE

Food Supplement - 510 mg each

90 CAPSULES

Best before end (shown on lid of bottle)

Store in a refrigerator – Below 8°, keep out of the reach of children.

Bifidophilus is a viable freeze-dried culture of *Lactobacillus acidophilus* and *Bifidobacterium longum* in a fructooligosaccharide (FOS) and carrot powder base. Bifidophilus is designed to populate the intestinal tract with 'friendly' lactobacilli flora and bifidobacterium. Milk-Free Bifidophilus is a 'probiotic' supplement providing living organisms that benefit the body. It contains 2.5 billion *L. acidophilus* and 1 billion *B. longum* per capsule at end of expiration date.

Probiotic Bifidophilus is freeze-dried to preserve viability and contains no wheat, soy products or preservatives. The FOS acts as food to support the growth of friendly bacteria in the intestinal tract. Best if used before expiration date. Keep frozen or refrigerated.

Food supplements should not be used as a substitute for a balanced diet.
